    - o Civilization –5000 BP to the present
  - ii) Based on objects out of which early human made instruments of labor
    - o Stone Age– 2,000,000 – 5000 BP
    - o Bronze Age –5000 –4000 BP

- Iron Age –4000 BP to the present

iii) Based on aspects of human Economic life

- ❖ Hunting and gathering –8000 BP
- ❖ Farming and animal husbandry –8000 – 1750 A.d
- ❖ Age of Industry –1750 A.d to the present

➢ History of humanity is also divided into two major periods. The beginning of the technique of writing marked the boundary.

i) **Pre – history**

- Events that took place before 6000 BP studied under pre-history
- This period coincided with the stone Age which lasted from 2,000,000 BP up to 5000 BP

ii) **Period of History**: - began about 6000 BP

- There is no fixed and uniform time gap for subdivision through the world. Every continents followed the per iodizationthat fits with its own civilization or state formation.

i) European history: -

- Ancient –1250 (the rise of civilization in ancient Greece) lasted up to 5^{th} C A.d

- According to the scientific theory human beings developed from a ting creature called hominid.
- Homindis were the ancestors of human beings they appeared about 25-40 million years ago.
- Homidis are members of the scientific family made up of human beings and pre-historic human like creature.
-Gorillas and chimpanzees (African apes)are the closest living relatives of human beings. They belonged to a zoological family called pongidae.
- Human beings chimpanzees and gorillas developed from a common ancestors. Lived between 8 and 5 million years ago.
-98.5% of the genes in people and chimpanzees are identical. it means that both humans and chimpanzees evolved from the same ancestors. About million years ago the split between the two took place.

2.2 The First Humans
