SECTION 4 – GEOGRAPHY

1. Geography Information System (GIS) can be applied to all of the following **EXCEPT** one
   A. Building construction sites
   B. The management of transport and logistical problems
   C. Environment and natural resource management
   D. The analysis of urban growth and expansion

Explanation:- Geographic information system (GIS) can be applied in management of transport and logistical problems, natural resource management, the analysis of urban growth and expansion, airport noise management, wild fire lookout and the like.

Answer:- A

2. **Which of the following does NOT influence the development of road transport network?**
   A. Topography
   B. Technological development
   C. Language diversity
   D. Land use and settlement patterns

Explanation:- The development and construction of road transport networks are influenced by topography, technological development and land use and settlement patterns.

Answer;- C

3. _____ Refers to a place where a pirate river diverts the headwater of its victim river
   A. Base level B. Incision C. Wind gap D. Elbow of capture

Explanation:- Elbow of capture refers to a place where a pirate river diverts the head water of a victim river.

Answer:- D

4. Which one of the following is correct about drainage patterns?
   A. A radial drainage pattern typically develops on the slopes of a volcanic cone
   B. A rectangular drainage pattern is found in areas where rivers flow towards a central basin
   C. Tectonic forces lead to the formation of a dendritic drainage pattern
   D. A trellises drainage pattern usually develops in areas of flat sedimentary deposits

Explanation:- Radial drainage patterns occur where rivers flow in all directions away from a raised features. The raised feature may

Telegram: https://t.me/ExtremeSeries

be a volcano or mass of rock that is more resistant to erosion than the surround rock and therefore stands higher than its surrounding.

Answer:- A

5. Which one of the following is correct about vertical exaggeration in maps?
   A. Vertical exaggeration minimizes distortion in maps
   B. Vertical exaggeration causes the slope of a hillside to look gentler than it really is
   C. The degree of vertical exaggeration depends on the scale of the map
   D. Vertical exaggeration occurs when a vertical scale is smaller than a horizontal scale

Explanation:- Vertical exaggeration of a cross-section is determined by considering the scale of the map & the nature of the terrain.

Answer:- C

6. What distinguishes an urban settlement from a rural settlement?
   A. Population size of the settlement
   B. Physical size of the settlement
   C. Physical infrastructure
   D. Main occupation of the population

Explanation:- Main occupation of the population is important criterion to distinguishes an urban settlement from rural settlement. For a place to be considered as urban majority of the population should engaged on non-agricultural activities.

Answer:- D

7. The relative proportion of male and female population is expressed by:
   A. Economic ratio
   B. Sex structure
   C. Age structure
   D. Dependency ratio

Explanation:- Age structure is a term used to describe the relative proportion of male and female population.

Answer:- B

8. Gibra (*Lobelia rhynochopetalum*) and Asta (*Erica arborea*) are examples of
   A. Afro-alpine vegetation
   B. Steppe vegetation
   C. Woodland vegetation
   D. Savanna vegetation

Explanation:- Afro-alpine vegetation includes plants that grow at an altitude over 3300m. Gibra and Asfa are good example of such vegetation.

Answer:- A

9. Where is Mount Batu found?

Telegram: https://t.me/ExtremeSeries

A. Hararghe plateau
B. Shewan plateau
C. Bale massifs
D. Arsi plateau

Explanation:- Mount Batu, which is 4307m above mean sea level, is found in the Bale massifs.

Answer:- C

10. Countries of the Horn of Africa lie in the GMT + 3 time zone due to their
A. Vicinal location
B. Absolute location
C. Geological location
D. Relative location

Explanation:- Horn African countries are lie in the GMT + 3 time zone due to their absolute location.

Answer:- B

11. Which map types use lines of equal value to show areas with continuous distribution?
A. Isopleth maps
B. Flow maps
C. Sketch maps
D. Choropleth maps

Explanation:- Isopleth maps are quantitative distribution maps that use lines that pass through points of equal value.

Answer:- A

12. The techniques and procedures used to undertake research is termed as:
A. Research approach
B. Research methods
C. Research methodology
D. Research project

Explanation:- Research methodology is a scientific techniques and procedures used to undertake research.

Answer:- C

13. What is the most likely cause for low level of economic development in many African countries?
A. Political instability and poor governance
B. High population pressure
C. Poor natural resource endowment
D. High mean annual temperatures

Explanation:- Political instability, civil war, lack of good governance are the most likely causes for low level of economic development many African countries.

Answer:- A

14. Which one of the following characterizes the African population?
A. Low infant mortality rate
B. High rate of natural increase
C. High life expectancy at birth
D. Low dependency ratio

Telegram: https://t.me/ExtremeSeries

Explanation:- African population is characterized by high rate of natural increase, high infant mortality rate, low life expectancy at birth and high dependency ration. **Answer:- B**

15. Which one of the following hierarchy of settlements is correct according to ascending population size?
    A. Hamlet – village – town –city- metropolis
    B. Village – town – hamlet – city – metropolis
    C. Metropolis – town – city – village – hamlet
    D. Village – hamlet – town – city – metropolis

Explanation:- Isolated dwelling – Hamlet – Village – town – Large Town – City – large city – Metropolis – Conurbation – megalopolis is the hierarchy of settlements in ascending population size. **Answer:- A**

16. In which part of a river course is the presence of waterfalls, rapids and cataracts observed?
    A. Middle course
    B. Upper course
    C. Lower course
    D. In the river delta

Explanation:- In the upper course there are waterfalls, rapids and cataracts. **Answer:- B**

17. Which one of the following is **NOT** correct about contour lines?
    A. Closely spaced contour lines represent a gentle slope
    B. All points on a given contour line are of the same elevation
    C. Contour lines are generated from spot heights
    D. Contour lines are used to show the relief of an area

Explanation:- Contour lines are lines that connect points on the same altitude on a map. When contours are closser to each other, they represent steep slope. **Answer:- A**

18. In topographic map, a cliff is best represented by
    A. Closely spaced contour lines
    B. Widely spaced contour lines
    C. Contour lines that cross each other
    D. Overlapping contours

Explanation:- Overlapping or merging contours represent a cliff on a topographic map. **Answer:- D**

19. _____Represents the Earth's life sphere.
    A. The troposphere
    B. The biosphere
    C. The ionsospher
    D. The anthroposhere

Telegram: https://t.me/ExtremeSeries

Explanation:- The biosphere represents the Earth's life sphere.

Answer:- B

20. What is the concern of temporal perspective in Geographical studies?
    A. The chronological pattern of phenomena
    B. Where and why are phenomena located
    C. What phenomena are found where
    D. How phenomena are related to one another

Explanation:- The concern of temporal perspective in geographical studies is the chronological patterns of phenomena.

Answer:- A

21. Which of the following is correct about the geologic history of the Horn of Africa?
    A. The Paleozoic era is known for the predominance of reptiles
    B. The thickness and age of Adigrat sandstone progressively increases from the southeast to the northwest
    C. Most of the sedimentary rocks in the Horn of Africa were formed during the Precambrian era
    D. The geologic events of the Tertiary period resulted in the outpouring of huge quantities of basaltic lava

Explanation:- The geologic history of the Horn of Africa reveals that the geologic events of the Tertiary period resulted in the outpouring of huge quantities of basaltic lava.

Answer:- D

22. Ethiopia shares the longest and shortest boundary with _____ and _____.
    A. Sudan and Dijibouti
    B. Eritrea and Somalia
    C. Somalia and Djibouti
    D. Djibouti and Sudan

Explanation:- Ethiopia shares the longest boundary (1,750km) with Sudan and shortest boundary (310km) with Djibouti.

Answer:- A

23. Which one of the following map projections causes low level of distortion in representing the equatorial region?
    A. Planar projection
    B. Conical projection
    C. Zenithal projection
    D. Cylindrical projection

Explanation:- Cylindrical projection best suited to represent the equatorial region. The distortion increases north and south ward to the poles.

Answer:- D

24. Which of the following is correct about sampling?

Telegram: https://t.me/ExtremeSeries

A. The sample size of a homogenous population should be larger than a heterogeneous population
B. Large sample size provides more representation of the population
C. Non-probability sampling provides equal chance for every item of the population
D. Sample size has no much effect on the results of the research

Explanation:- Samples are representative of the population under study. The size of sample determine the quality of the research. Large sample size provides more representation of the population.

Answer:- B

25. _____ is an indicator of development which describes the total value of goods and services produced in a country in a specific period of time.
A. Gross National Product
B. Percapita Income
C. Gross Domestic Product
D. Gross National Income

Explanation:- Gross Domestic product (GDP) describes the total value of goods and services produced in a country in a specific period of time.

Answer:- C

26. Which one of the following better describes the difference between economic growth and economic development?
A. Economic growth is a measure of the amount of goods and services produced
B. Economic development is one aspect of economic growth
C. Economic growth measures the welfare of society
D. Economic growth is an indicator of structural and technological change

Explanation:- Economic growth is a measure of the amount of goods and services. On the other hand, economic development is an indicator of an overall structural and technological change.

Answer:- A

27. Which indicator best describes the difference between immigration and emigration?
A. Net migration
B. Gross migration
C. Rate of migration
D. Total migration

Explanation:- Net migration is the difference between immigration and emigration.

Answer:- A

Telegram: https://t.me/ExtremeSeries

28. Which one of the following is among the main reasons for the high death rate of the African population?
   A. Widespread use of contraceptives
   B. Low level of poverty
   C. Malnutrition
   D. Improved health services

Explanation:- Malnutrition, back ward health services, high incidences of tropical disease, civil war and conflicts are among the causes of high death rate in Africa.

Answer:- C

29. Which one of the following is correct about the population of Africa?
   A. African is the most populous continent in the world
   B. The rate of population growth in Africa is the fastest in the world
   C. North Africa is the most densely populated regions of Africa
   D. The African population is characterized by long doubling time

Explanation:- The rate of population growth in Africa is the fastest in the world. As a result, the population of Africa has the shortest doubling time.

Answer:- B

30. _____ is a soil conservation method that involves the covering of the soil with plant residues to conserve soil moisture and regain soil fertility.
   A. Mulching B. Fallowing C. Green manure D. Crop rotation

Explanation:-Mulching is a soil conservation method that involves covering of soil with plant residues to conserve soil moisture and regain soil fertility.

Answer:- A

31. In which of the following area in Africa is wind a dominant agent of soil erosion?
   A. The east African highlands
   B. The tropical rainforests
   C. The Sahel region
   D. The Congo basin

Explanation:- In the Sahel region of Africa wind is the most dominate agent of soil erosion.

Answer:- C

32. _____is a dark colour soil type with high content of shrinking and swelling clay minerals.
   A. Acrisol B. Vertisol C. Nitosol D. Livisol

Explanation:- Vertisol is a dark color soil type with high continent of shrinking and swelling clay minerals.

Answer:- B

33. The savanna vegetation in Africa is characterized by
   A. Mixed woodland and grass ecosystem
   B. Evergreen and deciduous trees
   C. Alpine plants
   D. The dominance of xerophytes

Telegram: https://t.me/ExtremeSeries

Explanation:- Tropical grassland (Savanna) vegetation of Africa are characterized by mixed wood land and grass eco system.

Answer:- A

34. Identify the correct pairing.
    A. Lake Volta – Nigeria
    B. Lake Victoria – Ghana
    C. Lake Turkana – Kenya
    D. Lake Nasser – Malawi

Explanation:- Lake Turkana is one of the Rift Valley lakes which is found in Kenya. It is 8,660km^2 wide and its maximum depth is 72 meter.

Answer:- C

35. Which climatic region of Africa is dry during the summer season?
    A. The Mediterranean climate region
    B. The highland climate region
    C. The equatorial climate region
    D. The tropical continental climate region

Explanation:-The Mediterranean climate region of Africa found in the north and south western tip of Africa. It has warm to hot and dry summer and mild to cold, wet winter.

Answer:- A

36. Which contributed most for Africa to be the hottest of all continents of the world?
    A. High altitudinal range
    B. Presence of adjacent water bodies
    C. Latitudinal location
    D. Longitudinal range

Explanation:- Most of Africa is found within the tropics where there is high angle of the sun. As a result, the continent is warmer than other continents.

Answer:- C

37. Which one of the following African countries is outside the Rift Valley area?
    A. Mozambique B. Burundi C. Malawi D. Sudan

Explanation:- The Great East African Rift Valley stretches from Red sea to Malawi. It is about 5,600 km long in Africa and cross 15 countries. However, Sudan is not crossed by the Rift Valley.

Answer:- D

38. Which major geological event took place in Africa during the Paleozoic era?
    A. Orogenesis
    B. Mineralization of rocks
    C. Denudation
    D. Extensive lava flows

Telegram: https://t.me/ExtremeSeries

Explanation:- Paleozoic Era cover from 600 to 250 million years before present. Some of the major events that took place during this era were series of denudation and peneplanation, heavy erosion and coal formation.

Answer:- C

39. The straight of Bab-el Mandeb connects Africa with
A. Asia B. Europe C. India D. South America

Explanation:- The straight of Bab-el Mandeb is 40km wide narrow water body which connect Africa with Asia.

Answer:- A

40. Which one of the following is **NOT** among the domains of Geographic Information System (GIS)?
A. Data manipulation
B. Data analysis and presentation
C. Data Storage and management
D. Data discussion

Explanation:- The domain of GIS include the hardware, software and procedures designed to support the capture, management, manipulation, analysis, modeling and display of spatially referenced data

Answer:- D

41. In which of the following settlement types do you expect to find collective amenities such as shops, schools, places of worship and entertainment?
A. Nomadic settlements C. Dispersed settlements
B. Isolated dwellings D. Nucleated settlements

Explanation:- In nucleated settlements it is common to find collective amenities such as shops, schools, places of worships and entertainment.

Answer:- D

42. Which of the following parts of the world is the leading export destination for Ethiopian commodities?
A. Asia B. Europe C. North America D. Africa

Explanation:- Europe was the leading export destination for Ethiopian commodities.

Answer:- B

43. Which one of the following is **NOT** among the main challenges of the Ethiopian economy?
A. Labour shortage
B. Climate change and variability
C. Capital constraint
D. Lack of good governance

Telegram: https://t.me/ExtremeSeries

Explanation:- Ethiopia is the 2nd largest in terms of population size in Africa. Thus, it is not the main challenge of the economy of Ethiopia.

Answer:- A

44. Which one of the following is **NOT** an industrial crop?
    A. Coffee B. Sesame C. Sugarcane D. Chat

Explanation:- Industrial crops are crops that are used as raw material for agro-processing industries. Chat is not industrial crop.

Answer:- D

45. Which one of the following countries is known for its anti-natalist population policy?
    A. China C. North Korea
    B. United States of America D. France

Explanation:-Anti natalist population policy discourage population growth in general and fertility in particular. Most developing countries adopt such policy.

Answer:- A and C

46. One of the following is **NOT** among the causes of high Maternal Mortality Rate in Ethiopia.
    A. Poverty
    B. Limited access to health services
    C. Rural – urban migration
    D. Early marriage and abortion

Explanation:- Maternal mortality rate is high in Ethiopia. Some causes are poverty, limited access to health services and early marriage and abortion.

Answer:- C

47. Which of the following Mortality Rates is the highest in Ethiopia?
    A. Child Mortality Rate C. Maternal Mortality Rate
    B. Infant Mortality Rate D. Adult Mortality Rate

Explanation:- Infant mortality Rate (IMR) is the highest in Ethiopia. Based on 2005 data 1out of 13 died before the age of one.

Answer:- B

48. Where do we commonly find temporary settlements in Ethiopia?
    A. The pastoral areas C. The peri – urban areas
    B. The river valleys D. The highlands of Ethiopia

Telegram: https://t.me/ExtremeSeries

Explanation:-The lowlands in most parts of the Rift Valley and peripheral areas of Ethiopia are characterized by pastoralism with temporary settlement.

Answer:- A

49. Which of the following crops is widely cultivated in areas of low population density in Ethiopia

A. Enset B. Coffee C. Teff D. Sorghum

Explanation:- Sorghum is a crop widely cultivated in the areas of low population density in Ethiopia.

Answer:- D

50. Which one of the following is correct about the population of Ethiopia?

A. The growth rate of the Ethiopian population shows a slight decline
B. Ethiopia is among the least populous nations in Africa
C. The distribution of the Ethiopian populations is reasonably even
D. Aging is a major challenge of the Ethiopian population

Explanation:- Ethiopia is one of the populous country. Its population growth is the highest but show slight decline in recent years.

Answer:- A

51. According to Karl Marx, food scarcity among population should be understood in relation to

A. The potentials of technological innovation
B. Natural resource degradation
C. The adoption of preventive checks
D. Unequal distribution of resources

Explanation:- If there is food scarcity among the population, Karl Marx believed that there is unequal distribution of resources.

Answer:- D

52. All of the following are factors that influence the process of soil formation **EXCEPT** one?

A. Overgrazing C. Climate
B. Organisms D. Parent material

Explanation:- Overgrazing is keeping large number of cattles in a small patch of land. So that, the cattles eat everything and expose the soil for degradation.

Answer:- A

53. Which one of the following climate types of Africa is least affected by the **ITCZ**?

Telegram: https://t.me/ExtremeSeries

A. Afro – alpine climate
B. Mediterranean climate
C. Desert Climate
D. semi – desert climate

Explanation:- ITCZ is a low pressure belt which moves with the overhead sun. Mediterranean climate due to its location outside of the tropics, where the influence of ITCZ is high, it is the least affected.

Answer:- B

54. Which one of the following soil types is found in the arid and semi – arid areas of Ethiopia?

A. Xerosols B. Cambisols C. Nitosols D. Lithosols

Explanation:- Xerosols are generally young and shallow. Soils and are found in arid and semiarid regions of Ethiopia.

Answer:- A

55. Which of the following measures can be used for the conservation of natural vegetation?

A. Overgrazing
B. Agroforestry
C. Slash and burn
D. Mulching

Explanation:- Agroforestry, social forestry, reforestation and afforestation are some of the conservation methods of forest resources.

Answer:- B

56. Which endemic animal is found in both the Semien Mountains and the Bale highlands of Ethiopia?

A. Semien Fox
B. Wild Ass
C. Swayne's Hartebeest
D. Walia Ibex

Explanation:- Semien Fox (key kebero) is found in Bale massifs and semien highlands.

Answer:- A

57. Which of the following rain bearing winds carry moisture to the Ethiopian highlands during the summer season?

A. Southwesterly winds
B. Northwesterly winds
C. Equatorial westerlies
D. Northeast trade winds

Explanation:- The most important source of rain in summer season in the highlands of Ethiopia are Equatorial Westerlies.

Answer:- C

58. In which agro-ecological zone is most agricultural land of Ethiopia located?

A. Woina Dega B. Kolla C. Dega D. Wurch

Explanation:- Woina-Dega zone areas contain most of Ethiopia's agricultural land.

Answer:- A

Telegram: https://t.me/ExtremeSeries

59. Which one of the Ethiopian lakes is located outside the Rift Valley system?
A. Abaya B. Chamo C. Langano D. Tana

Explanation:- Lake Tana is found outside of the Rift Valley around the NW highlands. It is 3,600 km^2 wide and its maximum depth is 9 meter.

Answer:- D

60. Which of the following landforms is a watershed between river Abay and river Awash?
A. The Gojjam massif C. The Tigrean Plateau
B. The shewan plateau D. The Amhara Saynt Massif

Explanation:- The shewan plateau is a dome-shaped plateau that serves as a watershed (divide) between the Awash and Abbay River basins.

Answer:- B

61. Which one of the following is an example of a primary source of data?
A. Diaries C. Journals
B. Historical records D. Interviews

Explanation:- Primary data sources are original in character. The researcher him/herself produces the data. Examples are personal observation, interview, questionnaires, discussion with groups of people, etc.

Answer:- D

62. Which of the following research approaches involves the use of ethnography and participant observation for data collection?
A. Quantitative approach C. Qualitative approach
B. Desk review approach D. Simulation approach

Explanation:- Qualitative approach could involves the use of ethno-graphy and participant observation for data collection

Answer:- C

63. _____ refers to the average lifespan of a newly born infant under current morality levels.
A. Life expectancy C. Doubling period
B. Infant mortality rate D. Dependency ration

Explanation:- Life expectancy refers to the average lifespan of a newly born infant under current mortality rate.

Answer:- A

64. The navigability of most African rivers is hindered by
A. The steady volume of flow
B. Steep water courses

Telegram: https://t.me/ExtremeSeries

C. The trans boundary nature of the rivers
D. Shallow depth of the waters

Explanation:- Steep water courses and seasonal fluctuation of African rivers makes them difficult for navigation.

Answer:- B

65. The equatorial type of climate in Africa is characterized by
A. Low angle of the sun
B. Low mean monthly temperature
C. Low annual range of temperature
D. Low daily range of temperature

Explanation:- Equatorial type of climate in Africa characterized by high daily and low annual range of temperature, high mean monthly and mean annual temperatures and high total annual rainfall.

Answer:- C

66. In which part of Africa do we find the highest relief?
A. Western Africa
B. Northern Africa
C. Southern Africa
D. Eastern Africa

Explanation:- Eastern Africa relief in general is the highest in the continent. The highest point in Africa, Kilimanjaro Mountain (5895m) founds in East Africa.

Answer:- C

67. In which region of Africa are the Atlas Mountains found?
A. Eastern Africa
B. Northern Africa
C. Western Africa
D. Southern Africa

Explanation:- Atlas Mountain is one of the young fold mountains found in Northern Africa.

Answer:- B

68. Which one of the following is **NOT** among the advantages of air transport?
A. It is the most affordable means of transport
B. It is least affected by physical barriers
C. It is the fastest mode of transport
D. It is most appropriate for transporting perishable goods

Explanation:- Air transport is the least affected by physical barriers. It is fastest and suitable for transporting perishable goods. However, it is the most expensive

Answer:- A

69. _____ is a push factor that likely causes rural – rural population migration in Africa.
A. Infrastructure development
C. Employment opportunities

Telegram: https://t.me/ExtremeSeries

B. Improved housing D. Natural disaster

Explanation:- Natural disaster is a push factor that likely causes rural_rural migration in Africa.

Answer:- D

70. _____refers to an area that separates adjacent drainage basins
A. Water divide C. Drainage system
B. Tributary D. Confluence

Explanation:- Water divide (watershed) refers to an area that separates adjacent drainage basins.

Answer:- A

71. Identify a landform type which is different from the others
A. Saddle B. Ridge C. Depression D. Valley

Explanation:- Saddle, Depression and valley are low-lying grounds. However, ridge is a sloping line of high ground.

Answer:- B

72. What does a spot height represent on topographic maps?
A. Measured altitude of a specific point
B. Height of places between successive contours
C. The distance between two specific points
D. The slope of a specific point

Explanation:- Spot height represent the exact height of the ground surface above mean sea level.

Answer:- A

73. Which one of the following geographical approaches is most appropriate for the study of the interaction between biophysical and socio-economic phenomena in a particular area?
A. Topical approach C. Systematic approach
B. Thematic approach D. Regional approach

Explanation:- Regional approach is suitable for the study of the interaction between biophysical & socio-economic phenomena in a particular area.

Answer:- D

74. Which one of the following pairing is **NOT** correct?
A. Ghibe – Gilo C. Ghenale – Dawa
B. Tekeze – Angereb D. Awash – Akaki

Explanation:- The correct pair of river and tributaries are Baro-Ghilo; Tekeze-Angerb; Ghenale-Dawa and Awash-Akaki.

Answer:- A

75. Which of the following is the main reason why relatively low mean monthly temperatures are recorded on Ethiopian highlands in summer?
A. Ethiopia's latitudinal location

Telegram: Https://t.me/ExtremeSeries

B. The prevalence of high cloud cover
C. The country's distance from the sea
D. The altitude factor

Explanation:- The main reason why relatively low mean monthly temperatures are recorded on Ethiopian highlands in summer is the prevalence of high cloud cover. **Answer:- B**

76. To which major drainage system of Ethiopia does the Ghibe River drainage system belong?
A. The Inland (Rift Valley) Drainage System
B. The Western (Mediteranean) Drainage System
C. The Southeastern Drainage System
D. The southern Omo Drainage System

Explanation:- The Ghibe River drainage system belongs to the Inland (Rift Valley) Drainage system. **Answer: A**

77. Where do we find the active volcano of Ertalle?
A. The Upper Awash Valley
B. The Rift Valley lakes district
C. The Afar triangle
D. The Red Sea coastal plains

Explanation:- The active volcano of Ertalle is found Afar Triangle of the Rift valley. **Answer:- C**

78. What is the other name for maps the emphasize the distribution of a single geographic element or character?
A. Thematic or special purpose maps
B. Charts
C. Reference or general purpose maps
D. Topographic maps

Explanation:- Thematic or special purpose maps emphasize the distribution of a single geographic element or character.

Answer:- A

79. One of the following is **NOT** a major destination of the intra – continental labor migrants in Africa
A) The Gold and diamond mines of the Republic of South Africa
B) The Danakil salt plains of the Afar Region of Ethiopia
C) Oil fields of Nigeria and north Africa
D) Citrus and Vine planation of Algeria, Tunisia and Morocco

Telegram: https://t.me/ExtremeSeries

Explanation:- The Danakil salt plains of the Afar Region of Ethiopia is not a major destination of the inter-continental labor migrants in Africa.

Answer:- B

80. One of the following is **NOT** a major cause of drought in Africa
   A. Increased use of commercial fertilizers and improved seeds
   B. Unwise use of natural resource
   C. Expansion of farm lands and settlements
   D. Increasing human and livestock populations

Explanation:- Some of the causes of draught in Africa are unwise use of natural resources, expansion of farm lands and settlements and increasing human & livestock population.

Answer:- A

81. The three leading economic sectors of Ethiopia according to their contribution to the GDP from the highest to the lowest is
   A. Agriculture, Industry and Services
   B. Services, Agriculture and Industry
   C. Services, Industry and Agriculture
   D. Industry, Agriculture and Services

Explanation:- The three leading economic sectors of Ethiopia according to the contribution to the GDP from the highest to the lowest are services, agriculture and Industry. **Answer:- B**

82. Which of the following statements shows Esther Boserup's argument about the relationship between population growth and food supply?
   A. Technological advancement would ensure that food supply will keep up with population growth
   B. If population growth outstrips the means of subsistence, positive checks will apply
   C. The poor are to be blamed for their own poverty
   D. Food production is limited and population cannot increase beyond the means of subsistence

Explanation:- Esther Boserup argued that technological advancement would ensure that food supply will keep up with population growth.

Answer:- A

83. Which of the following statements is correct about the wild animals of Ethiopia?
   A. Virtually all types of mammals found in East Africa are also found in Ethiopia

Telegram: https://t.me/ExtremeSeries

B. Ethiopia's wild animal stock is generally similar to that of East Africa as whole
C. All of the endemic animals of Ethiopia inhabit the highlands
D. Ethiopia's wild Ass population is confined to the Afar lowlands

Explanation:- Ethiopia's wild Ass population is confined to the Afar lowlands.

Answer:- D

84. Which of the following was **NOT** among the main reasons why the Dega zone areas were historically home of concentrated human settlement?
A. Its suitable location for the people to defend themselves from threats
B. Its reliable rainfall and support for two growing periods per year
C. The people's lack of choice to settle in lower and warmer agro climatic zones
D. The absence of vector borne diseases such as malaria

Explanation:- Historically Dega Zone areas were home of concentrated human settlement due to its suitable location for defense, its reliable rainfall and absence of vector borne diseases.

Answer:- C

85. What is the final step in a research project?
A. Compiling the bibliography or references
B. Preparing the research report
C. Generalizing and interpreting the data
D. Writing the concluding remarks

Explanation:- The final step of research work is preparing the research report.

Answer:- B

86. Which of the following statement is **NOT** correct about the Tropical Rainforests of Africa?
A. They are largely confined to Central and Western Africa and Eastern Madagascar
B. They have significantly low species diversity
C. They contain broad-leafed evergreen trees
D. They have little undergrowth as the canopy of the tall trees prevent the penetration of light

Telegram: https://t.me/ExtremeSeries

Explanation:- Tropical Rain forests of Africa have significantly high species diversity. Within 1km^2 area, there will be up to 3000 species of plants.

87. Which of the following statement is **NOT** correct about the outcomes of the analytical method of inquiry in geography? **Answer:- B**

A. It weakened the quantitative revolution
B. It led to the development of Applied Geography
C. It helped geography to become a more law-giving science
D. It weakened the conception of Geography as and ideographic field of study

Explanation:- The analytical method of inquiry in geography strengthened the quantitative revolution and also pave the way for the development of Applied Geography.

88. What is the focus of Thomas Malthus's population theory? **Answer:- A**

A. The importance of positive checks to regulate population growth
B. The influence of capitalist modes of production
C. The positive effects of population on food production
D. The power of the earth to produce enough food to meet growing demands

Explanation: - The main focus of Thomas Malthus's population Theory is on the importance of positive checks to regulate population growth. **Answer:- A**

89. What is the main reasons for the high population growth in urban centers compared to the rural areas of Ethiopia?

A. High fertility rate in urban areas
B. Rural-urban migration
C. Limited use of family planning services in rural areas
D. Differences in early marriage

Explanation:-The main reason for the high population growth in urban centers of Ethiopia is the high rate of rural-urban migration. **Answer:- B**

90. Which one of the following activities could accelerate soil degradation?

A. Intercropping
B. Intensive cultivation
C. Contour plowing
D. Manuring

Explanation:- Intensive cultivation or over cultivation could accelerate soil degradation. **Answer:- B**

Telegram: https://t.me/ExtremeSeries

91. Which of the following towns is located in the autumn and spring rainfall regions of Ethiopia?
A. Jigjiga B. Harar C. Gode D. Assaita

Explanation:- The Autumn- spring Rainfall Region cover the south eastern highlands and associated lowlands up to the Somalia coasts. They can be represented by Gode, Moyalle, Jigjga, Yabello& Baydhabo.

Answer:- A & C

92. _____ is the wettest lowland in Ethiopia.
A. Omo-Ghibe lowlands C. Angereb lowlands
B. Baro-Akobo lowlands D. Abbay-Dander Lowlands

Explanation:- Baro – Akobo lowland is the wettest lowland in Ethiopia.

Answer:- B

93. In Azimuthal map projection
A. Longitudes are straight line radiating from the poles
B. Distortions increase towards the poles from the Equator
C. Parallels make arcs of concentric circles
D. All longitudes are equal in length from the Equator

Explanation:- In Azimuthal (Planar) projection, Longitudes are straight lines radiating from the poles and latitudes are concentric circles decreasing towards the center.

Answer:- A

94. Which of the following maps can best show population distribution in a specific area?
A. Topographic map C. Cadastral map
B. Thematic map D. Navigation map

Explanation:- Thematic maps can best show population distribution in a specific geographical area.

Answer:- B

95. _____describes the height of a specific location above the sea level.
A. Altitude B. Topography C. Relief D. Contour

Explanation:- Altitude describes the height of a specific location above the sea level.

Answer:- A

Items 96-100 are based on the map provided on the next page. These items should be attempted by sighted (NOT VISUALLY IMPAIRED) candidates only

96. The map distance between `C` and `H` is 4 centimeter. What is the crow flight distance between the two points in kilometer?
A. 8 B. 2 C. 80 D. 20

Telegram: https://t.me/ExtremeSeries

Explanation

- To find the crow fly distance, convert the R.F scale to statement scale $1:\frac{200,000}{100,000} = 1cm$ to $2km$
- Then convert MD = 4cm to crow fly distance using the scale relationship

$1cm = 2km$ $\Rightarrow ?.\ 1cm = 4cm \times 2km$

$4Cm = ?$ $? = \frac{4cm \times 2km}{1cm} = 8km$

Therefore, the crow fly distance between point C and H is 8km.

Answer:- A

97. What is the elevation of the highest peak on the map?
   A. More than 3800 meters above the sea level
   B. 3900 meters above the sea level
   C. 3650 meters above the sea level
   D. More than 3800 meters above the sea level

Explanation:- The V.I of the map is 100m. Thus, the highest point in the map, which is found NW of point D, is over 3900 mas.

Answer:- B

98. The landform shown by the line connecting points "F" and "G" is
   A. A valley B. A watershed C. A ridge D. A spur

Explanation:- V-shaped contours with bending points towards the lower point represent a spur. **Answer:- D**

99. The drainage pattern shown on the map is
   A. Trellis drainage pattern
   B. Radial drainage pattern
   C. Centripetal drainage pattern
   D. Rectangular drainage pattern

Explanation:- The central part of the mapped area is a raised feature and different river basins flow in different direction from it. Therefore, the pattern formed is radial drainage pattern.

Answer:- B

100. Point "A" is located to the _____ of point "D"
   A. Northwest B. Southwest C. Northeast D. Southeast

Explanation:- Point A is located to the north west of point D.

Telegram: https://t.me/ExtremeSeries

Answer:- A

Telegram: https://t.me/ExtremeSeries

1. What is the most sparsely populated country in northern Africa?
A. Tunisia B. Libya C. Egypt D. Algeria

Explanation: In northern Africa country Libya is sparsely country which is 4 density/km^2.

Answer: B

2. In which region of Africa is the highest infant mortality rate found?
A. Western Africa C. Northern Africa
B. Eastern Africa D. Central Africa

Explanation: Compared to other regions states in Africa central Africa has the highest infant mortality rate which is 95 infant death record per 1000 live birth.

Answer: D

3. Which one best characterizes the African population?
A. Low crude death rate in the world
B. High immigrants from other continents
C. Categorized as young age group
D. Dominated by old age population

Explanation: Africa is characterized by a predominantly young population this can be indicated by the median age. If the median age is low, it implies that the population is predominantly young, example the median age for Africa is 18 years.

Answer: C

4. What is the main reason for the low sex ration in sub-Saharan African countries?
A. The region is characterized by a large number of female immigrants
B. The drought condition of the region highly affects male population
C. There is huge loss of male population due to war and migration
D. Female births exceed male births in the region

Explanation: Sub-Saharan Africa sex ratio is below the world's average which is less than 100 because not only biologies but also socio economic factor like war and migration affect the proportion of male and female population composition

Answer: C

Telegram: https://t.me/ExtremeSeries

5. People often move from their original residence to another place in the same country in search of work. This happens for a short period as the people return to their original place when the working season is over. What is type of movement called?

A. International migration
C. Permanent migration
B. Intra-continental migration
D. Temporary migration

Explanation: Temporary migration involves the movement of people where by leave their original residence for another for a short period of time, and then come back to their original place. It practiced periodically, to field season job for annual or diurnal basis.

Answer: D

6. What is the **disadvantage** of migration to the losing countries?

A. It put more pressure on public services
B. It losses people in productive age group
C. It increases cost of services
D. It leads to overcrowding

Explanation: Disadvantage of migration to the losing countries can be loss of people in productive age group, lose people most likely have some education and skill etc.

Answer: B

7. Which one of the following is the **disadvantage** of migration to the receiving countries?

A. An increase in the number of skilled workers
B. A reduction in pressure on jobs
C. A reduction in social and racial tension
D. Communication barrier

Explanation: The disadvantage of migration to the receiving countries are communication barrier, limited skilled/ educated group, pressure on jobs racial tension are faced.

Answer: D

8. What is the main reason for the highest rate of urbanization in Africa?

A. High rate of urban to urban migration
B. Advancement of social services in urban areas

Telegram: https://t.me/ExtremeSeries

C. High fertility rate in the urban areas
D. The expansion of industries in urban areas

Explanation: The main reason for the highest rate of urbanization in Africa high fertility in the urban areas and High rate of rural. Urban migration, the continent has the world's highest rate of urbanization which is 5.4% per year.

Answer: C

9. In which region of Africa is the highest level of urbanization in found?
   A. Eastern Africa
   B. Southern Africa
   C. Western Africa
   D. Northern Africa

Explanation: In terms of rate of urbanization, eastern Africa (6.8%) followed by western Africa (5.5%).

Answer: A

10. Among the following, which one is the main impact of rapid urbanization in urban areas of Africa?
    A. Language difficulties
    B. Theft related crime
    C. Noise pollution
    D. Improper waste disposal

Explanation: Rapid urbanization is causing several challenges in Africa mainly expansion of social evils like crime, prostitution etc.

Answer: B

11. Which part of Ethiopia contributes rainfall water to the Wabishebelle River?
    A. Hararghe B. Keffa C. Shewa D. Illubabor

Answer: A

12. What are the two major rivers of inland drainage system in Ethiopia?
    A. The Baro- Akobo and the Tekezze Rivers
    B. The Wabishebelle and the Genale Rivers
    C. The Awash and the Omo-Ghibe Rivers
    D. The Abay and the Didessa Rivers

Explanation: The two major rivers of inland (riftvalley) drainage system in Ethiopia are the Awash and the Omo-Ghibe Rivers.

Answer: C

Telegram: https://t.me/ExtremeSeries

13. In which part of Ethiopia are most of the highland lakes found?

A. Shewa B. Wello C. Tigray D. Wellega

Explanation: Most of the high land lakes are found in Tigray.

Answer: C

14. Which one of the following is relatively the most utilized river for irrigation and hydroelectric power generation in Ethiopia?

A. The Ghibe River C. The Awash River

B. The Fincha River D. The Abbay River

Explanation: River Awash is the most utilized river for irrigation and hydroelectric power generation in Ethiopia because of the flat plain it crosses for hundred of kilometres.

Answer: C

15. Which one of the following represents the sphere of water bodies?

A. Anthroposphere C. Hydrosphere

B. Lithosphere D. Biosphere

Explanation: Hydrosphere represents the water surfaces of the earth including oceans, seas and lakes.

Answer: C

16. A geography teacher aims to teach course,introduction to Climatology'. He wants to cove the spatial distribution, variation and interaction of climatic system of the world course. Among the following geographical approaches, which one is the best approach for the teacher to use?

A. Systematic approach C. Quantitative approach

B. Regional approach D. Analytical approach

Explanation: Regional approach is preferable because used to study an area of the world.

Answer: B

17. Agricultural activities carried out in Ethiopia have contributed to climate change. Climate change has in turn an adverse impact on agricultural yields. To reduce the impact of climate change, Ethiopian farmers have developed different adaption strategies. Which school of geographical thoughts is concerned with such interactions between the environment and human activities?

Telegram: https://t.me/ExtremeSeries

A. Quantitative revolution
B. Environmental Perception
C. Environmental possibilism
D. Environmental determinism

Explanation: School of determinism is based largely up on the teaching of Friedrich Ratzed, it helds that environmental controls determine the activities of human.

Answer: D

18. What is the use of geographic knowledge that is used to solve spatial problems called?

A. Political geography
B. Applied geography
C. Human geography
D. Physical geography

Explanation: Applied geography has paved the way for solving problems that restrict human progress.

Answer: B

19. Which sub-field of geography studies the behavior of human population?

A. Historical geography
B. Population geography
C. Political geography
D. Cultural geography

Explanation: Population geography is concerned with the distribution, growth and structure of population.

Answer: B

20. The Awash and the Abbay river basins are separated from one another by the Shoan Plateau. In this case the Shoan plateau is

A. drainage basin
B. drainage system
C. drainage pattern
D. watershed

Explanation: Watershed is a dividing region between drainage areas, it is also a region or data bounded peripherally by a divide and drainage ultimately to a particular water course or body of water.

Answer: B

21. What type of drainage pattern do you expect in areas that consist of rocks of different hardness?

A. Rectangular
B. Centripetal
C. Trellis
D. Dendritic

Explanation: Trellis Drainage system develops in areas where hard-

Telegram: https://t.me/ExtremeSeries

er and softer rocks alternate.

Answer: C

22. Sources of rivers are a higher ground that are covered by hard rocks which cannot easily be eroded. If an area has ample rainfall, what type of drainage pattern, do you think, can develop in the area?

A. Rectangular
C. Trellis
B. Centripetal
D. Radial

Explanation: Because of the composition of hard and soft rock alternate can't be easily eroded. It greatly affected by tectonic forces (folds and faulting)

Answer: C

23. Under what condition is a river capture formed?

A. It is formed in a watershed that comprises higher ground.
B. It is formed in area where the pirate's river has a moderate slope and erosion resistant course.
C. It is formed when heavy precipitation occurs on the pirate's river side of the watershed.
D. It is formed in areas where the rock on the side of the victim river is harder.

Explanation: Conditions (situation) that causes the formation of river captures are heavy rainfall (precipitation) falls on the pirate's river side of the watershed, the rock on the side of victim river is softer, the pirate river has a steeper course and erodes its course as a result and the watershed consists of very low ground and the watershed it self becomes indefinite.

Answer: C

24. Among the following, which one explains the feature of a river at its middle course?

A. The slope of the river gets stepper than it does at the upper course.
B. The sediment carrying capacity is higher than it is at the lower course.
C. The volume of the river discharged is lower than it is at upper course.

Telegram: https://t.me/ExtremeSeries

D. The speed of water flow is faster it is at the upper course.

Explanation: Because of the volume of the river increase the sediment carrying is higher than it is at the lower course.

Answer: B

25. What is the average amount of money that an individual is expected to have as result of the country's gross national product?

A. Per capita income
B. Standard of living
C. Gross national product
D. Gross domestic product

Explanation: Per-capita income is indicative of the level of living standard. It is also strongly related to GDP.

Answer: A

26. Which African is sub-region is known for its low Gross Domestic Product (GDP)?

A. Horn of Africa
B. Magherb Africa
C. Western African
D. Southern Africa

Explanation: Western Africa has the lowest GDP in Africa.

Answer: C

27. What characterizes countries of low standard of living?

A. High life expectancy
B. Low per capita income
C. Standard housing
D. Low fertility rate

Explanation: One of the characteristics of low standard of living express is low per capita in come.

Answer: B

28. Which one of the following characterizes the African economy?

A. Tertiary economic sector has a major share in its GDP.
B. Secondary economic sector is the backbone of the African economy.
C. There is very inter high African communication network.
D. Its inter and intra-regional trade is at low.

Explanation: The major characteristics of the economy of Africa is that intercontinental, intra-regional and intra-continental trade is at low level, largely dependent on the agriculture sector.

Answer: D

Telegram: https://t.me/ExtremeSeries

29. Why are most countries of Africa considered to be **not** so developed?

A. There is high dependency on primary economic sectors.

B. They have high level of import substituting industries.

C. Their exports are mainly high value products.

D. Their economy largely depends on manufacturing sector.

Explanation: Africa considered to be developing because of its economy is highly dependent on primary economic sectors esp. agriculture. This economic sector still now uses very traditional methods.

Answer: A

30. Which one of the following adversely affect the prospect of African development?

A. Existence of free trades and common currency

B. Prevalence of political instability and civil war

C. Availability of untapped mineral resources

D. Large territorial and population size

Explanation: One of the adverse challenges of the prospect of Africa's development is political instability and civil war, lack of capital, lack of skilled human power and technology etc.

Answer: B

31. According to the 2009 World population Data Sheet, More than half of Africa population is

A. in the infant age group.
C. in the children age group.
B. in the old age group.
D. in the productive age group.

Explanation: Africa is characterized is predominantly young population or productive age group.

Answer: D

32. In which areas of Africa is placer mining commonly practiced?

A. In areas where there is dense vegetation

B. In areas of rock layered surfaces

C. At the top of the mountains

D. Near river valleys

Explanation: In Africa mining commonly practiced an areas of rock

Telegram: https://t.me/EytremeSeries

layered surfaces.

Answer: B

33. Which one of the following is the main factor for the low level of extraction and utilization of mineral resources in Africa?

A. Lack of initial capital for mineral resource exploitation
B. Lack of good governance and corruption
C. Shortage of economically active population
D. Lack of skilled human power in the mining sector

Explanation: There are plenty of reasons for low level of extraction and utilization of mineral in Africa among those lack of skilled human power in the mining sector is the main factor.

Answer: D

34. How cloud you explain the paradox between the potential and the actual resources exploitation in Africa?

A. There is improper resource exploitation in the continent.
B. Low potential resources is the cause for its underdevelopment.
C. There is low potential and high actual resources exploitation.
D. Resource are highly exploited to raise the standard of living.

Explanation: In Africa due to population growth and unwise use of natural resources are highly exploited with out considering future generations.

Answer: A

35. As the Lake Volta is to Ghana, so is the Lake Kaindji to

A. Zambia
B. Nigeria
C. Egypt
D. Zimbabwe

Explanation: As the Lake Volta is to Ghana, so is the Lake Kaindji to Nigeria.

Answer: B

36. Which of the swamps below is found in the Nile River basin?

A. Sudd swamps
B. Okovango swamps
C. Kamulando swamps
D. Timbukto swamps

Explanation: Sudd and Machar swamps are is found in the Nile River Basin

Answer: A

Telegram: https://t.me/ExtremeSeries

37. Why do the riparian states of the Nile River basin countries fail to agree on the use of the water?

A. The increasing water shortage in the upper course countries.
B. The absence of acceptable international water law concerning the river.
C. Egypt claims the largest quantity of the Nile River water.
D. The Upper course states of the Nile basin are desert and need more water.

Explanation: Because Egypt claims the largest quantity of the Nile River water.

Answer: C

38. What is the type of savanna that comprised many trees and grasses called?

A. True savanna
B. Thorn scrub savanna
C. High savanna
D. Park savanna

Explanation: Park (wetter) savanna is the transitional zone between the tropical rainforest and the true savanna grassland. They are made up of many trees and grasses.

Answer: D

39. What types of vegetation develops over the highlands of Ethiopia?

A. Semi desert vegetation
B. Afro- Apline vegetation
C. Tropical vegetation
D. Mangrove vegetation

Explanation: Afro- Apline vegetation develops over the tropical highlands of Africa, mainly over the Ethiopian and Eastern African highlands.

Answer: B

40. Which of the following is correct about the Mediterranean vegetation?

A. It is dominated by broad leafed trees.
B. The vegetations have short roots.
C. Maquis is the most common plant type.
D. It has low plant species diversity.

Explanation: The most common plant types in Mediterranean vege-

Telegram: https://t.me/ExtremeSeries

tation are maquis, cork oak and wild olive.

Answer: C

41. Which climatic region of Africa is associated with high diversity of tree climbing animals?

A. The Tropical desert climate
B. The Equatorial climate
C. The Highland climate
D. The Mediterranean climate

Explanation: The equatorial climatic region is associated with diverse is tree climbing animals like apes, monkey, etc.

Answer: B

42. Which of the following is a decisive measure to conserve the wildlife resources of Ethiopia?

A. Conserving natural vegetation
B. Establishing national parks
C. Encouraging legal hunting of wild animals
D. Raising the level of awareness of the community

Explanation: The decisive measure to conserve wild life resources of Ethiopia is conserving natural vegetation by a raising the level of awareness of the community.

Answer: A

43. The type of soil which is rich in humus content and develops in humid climatic regions of Africa is

A. Lixiols
B. Acrisols
C. Nitosols
D. Ferrasols

Explanation: Nitisols soils develop in humid climatic regions which is deep profile and are rich in humus content.

Answer: C

44. Which of the following is correct about human population growth in Africa?

A. The doubling time of population in the continent is very long.
B. The population growth rate of Africa is the slowest in the world.
C. The declining mortality in Africa is the highest in the world.
D. It is characterized by the gradual decline in the birth and death rate.

Explanation: The declining mortality in Africa is the highest in the

Telegram: https://t.me/ExtremeSeries

world.

Answer: C

45. In Ethiopia, where do you find more nucleated settlement?

A. Ghimbi B. Harar C. Assosa D. Gambella

Explanation: Because of population pressure the settlement pattern in Assosa is nucleated more.

Answer: B

46. In Ethiopia, there are towns developed along the main highway line form Addis Ababa to Mekele. Such towns can be an examples of

A. scattered settlement C. dispersed settlement

B. linear settlement D. nucleated settlement

Explanation: Foot paths (trails) are commonly found in rural Africa, and most of the people are served by trails and tracks.

Answer: A

47. What is the major factor that influences the location of settlement in the rural parts of the Ethiopian highlands?

A. Asphalt road C. Hydroelectricity

B. Military camp D. Fertile farmland

Explanation: The major factor that influences the location of settlement parts of the Ethiopian highlands is fertile farm land.

Answer: D

48. What is the main reason for the establishment of Addis Ababa at the foothills of the Entoto Mountain?

A. The presence of filwuha hot spring.

B. Its central location related to the rest of the country

C. The availability of dense vegetation cover

D. Its suitability for military camp

Explanation: The main reason for the establishment of Addis Ababa at the foothills of the Entoto mountain is due to military strategic purpose.

Answer: D

49. Which one of the following towns mostly serves as a center of exchange of goods and services.

A. Administrative towns B. Market towns

Telegram: https://t.me/ExtremeSeries

C. Industrial tows D. Cultural towns

Explanation: Market towns serves as a centre of exchange of goods and services.

Answer: B

50. What type of transport network is commonly used in areas where construction of graded surfaced road is extremely expensive?

A. Asphalt road C. Cart tracks

B. Railways D. Trails

Answer: C

51. Among the following, which one is the foremost physical factor that determines the development of road transport network?

A. Rainfall C. Temperature

B. Topography D. Land use and land cover

Explanation: the foremost physical factor that determines the development of road transport network is topography.

Answer: B

52. Among the following, which mode of land transport is feasible for Ethiopia to develop in most parts of its rugged topography?

A. Foot Paths C. Roads

B. Cable transport D. Railways

Explanation: Railway transport is feasible to developed in most parts of its rugged topography.

Answer: D

53. Which one of the following plays a decisive role in the development of Geographic Information Systems Technology?

A. The integration of Geographic Information Systems in disciplines such as geography and hydrology.

B. The establishment of the Harvard laboratory for computer graphics and spatial analysis.

C. The development and accessibility of computers.

D. The availability of spatial and non-spatial data

Explanation: The increased accessibility of computers in the 1970's as a turning point on the development of GIS.

Answer: C

Telegram: https://t.me/ExtremeSeries

54. A Geographic Information Systems has mostly been applied in

A. land -use planning.

B. wild animal monitoring

C. water quality monitoring

D. air pollutant concentration measurement.

Explanation: A Geographic Information Systems has mostly been applied in land-use planning.

Answer: A

55. What is the relative location of Ethiopia?

A. It is located southeast of Somalia.

B. It lies northeast of the Indian Ocean.

C. It is located to the southwest of Asia.

D. It is found south of Uganda.

Explanation: In terms of relative location Ethiopia is located to the to the south west of Asia

Answer: C

56. What looks like the shape of Ethiopia?

A. Compact shape

B. Linear shape

C. Fragmented shape

D. Truncated shape

Explanation: Ethiopia has more or less compact (circular) shape.

Answer: A

57. Which one of the following era is correctly paired with the geological event that took place in the Horn of Africa?

A. Cenozonic Era — Adigart sandstone

B. Mesozoic Era — Trappean lave series

C. Palaeozoic Era — Disappearance of the dinosaurs

D. Precambrian Era — Amoeba and jellyfish

Explanation: In the precambrain era the first forms of life emerged such as amoeba, and jellyfsih.

Answer: D

58. In which geological era were inselbergs formed in the Horn of Africa?

Telegram: https://t.me/ExtremeSeries

A. The Precambrian Era
B. The Paleozoic Era
C. The Cenozoic Era
D. The Mesozoic Era

Explanation: In cenozoic era inselbergs formed in the Horn of Africa.

Answer: C

59. Among the following, which event took place in Ethiopia during the Cenozoic Era?
A. Formation of rift valley landform
B. Formation of sedimentary rock
C. Predominance of invertebrates
D. Denudation and peneplanation

Explanation: During the cenozoic era most of the existing land forms of Ethiopia were formed.

Answer: A

60. One of the following Southeastern highlands of Ethiopia is the lowest, compared to all the others.
A. Plateau of Hararghe
B. Bale massif
C. Sidama highlands
D. Somali highlands

Explanation: Among the south eastern highlands of Ethiopians the Somalia highlands is the lowest its average altitude doesn't exceed 1500 meters.

Answer: D

61. What characterizes the rift valley section of Ethiopia?
A. Stability of the section
B. High and reliable rainfall
C. Low mean annual temperature
D. Availability of numerous lakes

Explanation: The rift valley section of Ethiopian is characterized by a large part of the area is covered by extensive salt plains and lakes (lake, Assale (116m b.s.l)and Lake Africa (80m . b. s. l).

Answer:D

62. Which part of the Southeastern lowland is located in Bale?
A. Borena plains
B. Benadir plains
C. Elkeri plains
D. Ogedaen plains

Telegram: https://t.me/ExtremeSeries

Explanation: The Elkeri plains (in Bale) is located in south eastern low land.

Answer: C

63. Why is Ethiopia called the ' Roof of North Eastern Africa'?

A. The landforms are made up of river -cut gorges and valleys.

B. Its largest part is highland relative to the surrounding areas.

C. Its landforms are formed as result of endogenic forces.

D. The country is found in the north eastern parts of Africa.

Explanation: Because of the condition from highland of the interior of the peripheral lowlands Ethiopia knowns as the "Roof of North Eastern Africa".

Answer: B

64. Which one of the following is the main characteristics of the Ethiopian rivers?

A. They originate from the lowland parts of the country.

B. Most of the rivers run through valleys and gorges.

C. They are suitable for navigation purposes.

D. Most of the rivers show low seasonal fluctuation.

Explanation: Most of the major rivers descend from great heights and flow through deep gorges.

Answer: B

65. Which of the following controls of climate is mainly responsible for the interior part of Africa to experience continental climate?

A. Distance from the sea

B. Angle of the sun

C. Latitude

D. Cloud cover

Explanation: Latitude is responsible for interior part to experience continental climate.

Answer: D

66. Which of the types of wind listed below is significantly dominates the climate of the northern and the southern tips of Africa.

A. Northeast trade winds

B. Guinea monsoon winds

C. Southeast trade winds

D. Westerly winds

Explanation: The Guinea monsoon (equatorial westerly) winds

Telegram: https://t.me/ExtremeSeries

from the Atlantic ocean bring rainfall to the north of Africa up to the southern frings of the Sahara in July.

Answer: B

67. Which of the given months constitutes winter season in the Northern hemisphere?

A. September, October and November

B. June, July and August

C. March, April and May

D. December, January and February

Explanation: Winter season in the Northern hemispheres constitutes December, January, and February

Answer: D

68. Which statement describes the tropical continental climate of Africa?

A. It is located between the wettest and the driest zones.

B. It is found only in the northern hemisphere.

C. The mean annual rainfall in the region is 1500 millimeter.

D. It experiences low daily temperature throughout the year.

Explanation: Tropical continental (savanna) climate is found between 5° and15° N and S latitude and also a transformational zone between the wettest (equatorial) region and the driest (desert) region.

Answer: A

69. Which of the following is true about mountain climate in Africa?

A. Its rainfall decreases with rise in altitude.

B. Its similar to tropical climate.

C. Its mainly receives orographic type of rainfall.

D. It has high annual range of temperature.

Explanation: In high land (Mountain) climate orographic rain is commonly observed.

Answer: C

70. Which region in Africa is extremely affected by drought?

A. Western coastal region

B. South-eastern highland region

Telegram: https://t.me/ExtremeSeries

C. Sahel region

D. Equatorial region

Explanation: sub-Saharan (Sahel) region stretching from Senegal and Mauritania in the west to the Horn of Africa in the east extremely affected by drought.

Answer: C

71. Which drainage system in Africa the largest in terms of annual discharge?

A. The Inland drainage system

B. The Mediterranean Sea drainage system

C. The Indian drainage system

D. The Atlantic Ocean drainage system

Explanation: The western (Mediterranean) drainage system is the largest of all, both in aerial extent and volume of water out flow and also contributes sixty percent of the country's total annual water discharge.

Answer: B

72. The White Nile River originates from which country?

A. Ethiopia B. Tanzania C. Uganda D. Rwanda

Explanation: White Nile River originates from Uganda.

Answer: C

73. Which of the following is correct about the main features of the African rivers?

A. Most of the rivers have steep courses.

B. They have low seasonal fluctuation

C. Many rivers are suitable for navigation

D. The have low hydroelectric power generation potential

Explanation: As result of the continent's relief, most of the rivers in Africa have steep course.

Answer: A

74. What type of water body is formed when water is accumulated at the back of dams?

A. Swamps

B. Ocean

Telegram: https://t.me/ExtremeSeries

C. Artificial Lake D. Natural Lake

Explanation: Artificial Lake is formed when water is accumulated at the back of dams.

75. What is the main cause of civil Wars in Africa? **Answers: C**

A. Rapid rate of population growth in rural areas

B. Prevalence of rapid urbanization in the continent

C. Unfair utilization and allocation of resources

D. Scarcity of both agricultural and mineral resources

Explanation: Unfair utilization and allocation of resources results civil hars and political instability in Africa.

Answer: C

76. What is the discovery of new facts through a systematic inquiry of the problem identified called?

A. Research design C. Rehears method

B. Research D. Research approach

Explanation: Research is a systematic inquiry into causes or the discovery to new facts through planned and organized effort that requires time, money and skill.

Answer: B

77. Which of the reasons stated below encourages scientists to conduct research?

A. To add new things to the existing body of knowledge.

B. To provide job opportunity for different experts.

C. To make the study area the best living place

D. To suggest solution to every problems.

Explanation: The reason encourages scientist to conduct research is to suggest solution to every problems.

Answer: D

78. What type of research approach do you recommend to study the relationship between rainfall and elevation in Ethiopia?

A. Quantitative approach C. Personal observation

B. Questionnaire D. Qualitative approach

Telegram: https://t.me/ExtremeSeries

Explanation: In the case of study of the relationship between rainfall and elevation qualitative approach is preferable because with no previously existing theory or hypothesis is tested.

Answer: D

79. Which one of the following research objectives is best addressed by geographers?
   A. Examining the effect of underemployment on political stability
   B. Assessing the relationship between education level and crime rate
   C. Analyzing the gap between demand and supply
   D. Investigating the effect of human settlement on vegetation resource

   Explanation: The effect of human settlement on vegetation resources is best addressed by geographers because the human settlement and vegetation are directly related to geography.

   Answer: D

80. Which of the following would give you the training you need to acquire the skills of conducting studies from problem formulation down to reporting its results?
   A. Understanding the philosophy behind the research method
   B. Studying basic geographic research methodology
   C. Acquainting oneself with research methods
   D. Understanding the meaning of research

   Explanation: Before conducting a research a researcher should understand the philosophy behind the research method.

   Answer: A

81. If you plan to exercise elementary research work activities on the topic 'Why do many students feel uncomfortable with early afternoon classes.' Which is the following could be the appropriate approach for you to carry out this research?
   A. Qualitative
   B. Inferential
   C. Quantitative
   D. Simulation

   Explanation: The ease of the above situation inferential quantitative approach is preferable because of the target study uses existing data bases and infers characteristics or relationships from it.

   Answer: B

Telegram: https://t.me/ExtremeSeries

82. Which one of the following bounded the Horn of Africa in the south-east?

A. The Indian Ocean
B. The Red Sea
C. Sudan
D. Kenya

Explanation: The Horn of Africa in the south east bounded by Indian ocean.

Answer: A

83. Which one of the following is the largest country in the Horn of Africa?

A. Eritrea
B. Kenya
C. Somalia
D. Ethiopia

Explanation: In terms of size comparatively speaking Ethiopia is the biggest country total area 1,106,000 km^2.

Answer: D

84. Which one of the following is the main **disadvantage** if having large areal size for a country?

A. Having diverse ethnic group and culture
B. High expenditure for construction of infrastructure
C. Presence of a variety of mineral resources
D. Possession of diverse agro- climatic zone

Explanation: The main disadvantage of having large areal size for a country is the high cost of constructing infrastructure all over the country

Answer: B

85. Which of the following connects Africa with Europe?

A. Suez Canal
B. Strait of Gibraltar
C. Panama cana
D. Strait of Bab-el Manadab

Explanation: Strait of Gibraltar connects Africa with Europe.

Answer: B

86. What is the impact of the unbroken coastline of Africa?

A. Development of transport network among African countries has become easy.
B. It has encourages communication with neighboring continent.
C. External trades with other continents been enhanced.

Telegram: https://t.me/ExtremeSeries

D. Poor natural development is available.

Explanation: The impact of the unbroken coastline of Africa makes the continent poor in natural harboures.

Answer: D

87. Which of the following is correct about the northern Africa?
   A. Its surface configuration is dominated by mountains.
   B. It is characterized by tropical climate.
   C. It is a landlocked region in the continent.
   D. Its largest part is covered by dense vegetation.

   Explanation: Northern Africa is characterized by tropical climate.

Answer: B

88. What is the second most populated region in Africa?
   A. Eastern Africa
   B. Southern Africa
   C. Central Africa
   D. Western Africa

   Explanation: Next to Eastern Africa the second populous region in Africa is Western Africa with 48p/km^2.

Answer: D

89. In which region of Africa are both the highest and the lowest elevations of the continent found?
   A. Eastern Africa
   B. Western Africa
   C. Southern Africa
   D. Northern Africa

   Explanation: Eastern Africa is characterized by diverse relief such as very high volcanic mountains extensive plateaus, great rift valley and low depressions.

Answer: A

90. Which region in Africa accounts for the major mining and manufacturing industries of the continent?
   A. Western Africa
   B. Northern Africa
   C. Central Africa
   D. Southern Africa

   Explanation: Northern Africa accounts major mining and manufacturing industries of the continent.

Answer: B

91. Which geological event took place in Africa during the Paleozoic Era?

Telegram: https://t.me/ExtremeSeries

A. Formation of coal
B. Sea transgression
C. Extensive lava flows
D. Mountain building

Explanation: The formation of coal occurred in the Paleozoic Era during the carboniferous period.

Answer: A

92. Which one of the following explains the Mesozoic Era?
A. It is during this era that the Mediterranean Sea was formed.
B. It is in this era when mountains in Africa were formed.
C. It is known by sinking and uplifting of landmass of Africa.
D. It is the second longest era in geological history.

Explanation: During the Mesozoic era formation of sinking and uplifting of landmass of Africa too place.

Answer: C

93. Among the following, which one indicates mountain and its location in Africa?
A. Mt. Atlas — Tanzania
B. Mt. Killimanjaro — Cameroon
C. Mt. Meru — Kenya
D. Mt. Elgon — Uganda

Explanation: Mountain elgon is found in Uganda and Kenya border its elevation is 4,321m.

Answer: D

94. In which part of Africa is the impact of high altitude on climate highly visible?
A. The Cape ranges of South Africa
B. The Rift valley part of Ethiopia
C. The Benadir plains of Somalia
D. The Sahara desert

Explanation: In Africa, the impact of altitude on climate is highly pronounced in the areas of the atlas mountains the Cape Range fold mountains and the extensive East Africa Highlands.

Answer: A

Telegram: https://t.me/ExtremeSeries

Questions 95 -100 are about map reading. These questions should be done only by non-blind candidates. Questions 98, 98 and 100 refer to the attached map given below.

Telegram: https://t.me/ExtremeSeries

95. Which one of the following is correct about Zenithal map projection?

A. Less suited to map the polar landmasses.

B. Meridians are straight lines radiating from the equator.

C. Parallels are concentric circles.

D. True distance and directions are highly distorted.

Explanation: One of the charactertics of Zenithal map projection is parallels are concentric circles.

Answer: C

96. What is the landform shown by the line connecting points 'X' and 'Y'?

A. Valley B. Ridge C. Hill D. Saddle

Explanation: Valley is along narrow depressions lying between two or more higher grounds, contour showing r- valley, they are point's towards higher ground.

Answer: A

97. What is the astronomical location of Africa? It is located between

A. 1^0S to 18^0 N latitudes and 33^0E $51^0$24'E longitudes.

B. $34^0$52'S to $37^0$21'N latitudes and $17^0$33'W to $51^0$28'E longitudes.

C. 3^0N to 15^0N latitudes and 33^0E to 48^0E longitudes.

D. $17^0$33'W to $51^0$28'E latitudes and $34^0$52'S to $37^0$21'N longitudes.

Explanation: The astronomic location of Africa lies $17^0$33'W to $51^0$28'E latitudes and $34^0$52'S to $37^0$21'N longitudes.

Answer: D

98. Which points on the map are intervisible?

A. Points C and D C. Points S and T

B. Points R and C D. Points A and B

Explanation: Intervisible measure points, A and B located in different direction of they can be mutually seen that is point A can be seen point B.

Answer: D

99. Which one of the following is the basic difference between Globe and Map?

A. Globe is a representation of the actual shape of the earth while map is a flat drawing of the earth.

B. Map represents the entire parts of the world in one sheet whereas may globes are required to cover the world.

C. Map spins around an axis whereas a globe is a representation on a piece of paper.

D. Map is made of hard materials and cannot be folded while you can easily fold and carry globe.

Explanation: Globes are the most appropriate models for representing the surface of the earth because they are spherical while map is a

Telegram: https://t.me/ExtremeSeries

flat drawing of the earth.

Answer: A

100. Which type of feature is represented by 'H'?

A. Swamp
B. Settlement
C. Forest
D. Bench mark

Explanation: Swamp is the tract of low lying land which is permanently full of water.

Answer: A

101. Which meteorological stations represent the winter rainfall region of Ethiopia?

A. Assaita and Djibouti
B. Moyale and Yabello
C. Metu and Gambella
D. Gondar and Fitche

Explanation: Winter rainfall region in Ethiopia can be represented by stations such as Mitswa, Assaita and Djibouti.

Answer: A

102. What is the main control of climate that has made Ethiopia **not** exhibit tropical type of climate?

A. Cloud cover
B. Altitude
C. Latitude
D. Distance from the sea

Answer: D

103. Which season supplies rain to the Afar lowlands, while the rest to the country remains dry?

A. Autumn season
B. Spring season
C. Winter season
D. Summer season

Explanation: In winter rainfall only the red sea coastal plain, including parts of the Afar region, receive rain.

Answer: C

104. Which of the following necessitated the design and implementation of water resource management and conservation policy by the Ethiopian government?

A. Low water resource potential of the country
B. A rapid decrease in demand for portable water
C. An increase in the amount of rainfall in the country

Telegram: https://t.me/ExtremeSeries

D. Rapid reduction of the volume of water in the lakes and rivers

Explanation: In terms of water resource potentate, Ethiopia is the second richest country but the actual uses to the country's social, economic and environmental development show marked gap. In ordered to full fill this gap the Ethiopia government design and implement water resource management and conservation policy ratified.

Answer: D

105. What is the main source of the highest amount of moisture to the western lowlands of Ethiopia?

A. Monsoon winds
B. Equatorial westerlies
C. North easterlies
D. Southeast trade winds

Explanation: The Equatorial westerlies bring highest amount of moisture to the western lowlands of Ethiopia.

Answer: B

106. In which month does a high air temperature prevail in most parts of Ethiopia?

A. September
B. January
C. November
D. March

Explanation: In most of Ethiopia, high temperatures are recorded from march to June and low temperatures are recorded from November to February.

Answer: D

Telegram: https://t.me/ExtremeSeries

1. Which one of the following tree is an example of highland forests of Ethiopia?

   A. Acacia B. *Woira* C. *Sholla* D. Cactus

   Explanation: Highland forests of Ethiopia grow at an altitude between 1500m and 3300m. They consists of kerkha, Tid, zigba and woira forests.

   Answer: B

2. In which of the following places does woodland savanna vegetation predominate?

   A. Wollega B. Gonder C. Woliso D. Hawassa

   Explanation: In Ethiopia woodland savanna grasslands are found in southern half of Ziway, Lanagano, Abiyata and Hawassa.

   Answer: D

3. Which one of the following is associated to the slash and burn practices?

   A. It is keeping the land for grazing.

   B. It is preparing land for cultivation.

   C. It is the way of timber production.

   D. It is the process of charcoal production.

   Explanation: People are involved in slash and burn practices to clear forestland in order to prepare for farming.

   Answer: B

4. In which of the following areas are tourists not allowed to practice hunting in Ethiopia?

   A. Game reserves C. Local in color

   B. National parks D. Sanctuaries

   Explanation: Sanctuaries are wild animal conservation areas where hunting is strictly prohibited.

   Answer: D

5. What is the characteristics of the soil derived from crystalline rocks?

   A. Deep and fertile C. Black in color

   B. Poor and thin D. Rich in humus

   Explanation: Soils with crystalline rock background are poor and

Telegram: https://t.me/ExtremeSeries

thin. They are also rocky and acidic.

Answer: B

6. Which of the following type of soil in Ethiopia is limited to grazing purpose due to its poor drainage qualities?

A. Vertisols B. Acrisols C. Regosols D. Lithosols

Explanation: Verisols (black basaltic soil) are limited for grazing purpose due to their poor drainage quality.

Answer: A

7. Among the following factors, which one exerts the highest impact on Ethiopian soils?

A. Over cultivation
B. Road construction
C. Deforestation
D. Overgrazing

Explanation: Deforestation is progressing at a rapid rate and has become one of the main causes for Ethiopia's fastened erosion rate.

Answer: C

8. Imagine a given country is highly affected by famine and requests international communities for aid. However, these communities are unwilling to help the country. The fact that they believe famine could serve as a means to control population pressure. Which population theory is related to the issues given above?

A. Boserupian
B. Malthusian
C. Anti-Malthusian
D. Marxian

Explanation: Malthusian population theoriest believed that famine is one of a means to control population pressure.

Answer: B

9. Which of the statements below reflects the trends of population growth in Ethiopia?

A. The population size recorded in 2007 was three times more than that of the 1970s.
B. There has been an increase in the population growth rate over recent decades.
C. There was a slight increase in the rate of population growth from 1950s onwards.
D. There was a fast rate of population growth before the 1920s.

Telegram: https://t.me/ExtremeSeries

Explanation: With world wide efforts to control malaria and others diseases in the 1950s and later, the growth rate rose from time to time in Ethiopia.

Answer: C

10. How is the age structure of the Ethiopia population described?

A. Low number of dependent population

B. High number of old age population

C. Low number of young age population

D. High number of adult age population

Explanation: Age structure is the distribution of a given population into age groups. Based on 2007 census data, child,adult and old age comprises 45%, 51.8% and 3.2%, respectively.

Answer: D

11. There is a long lasting conflict of interest over the use of the Nile water between the upper and lower course counties. In order to solve this problem the basin countries have worked together and developed the Nile Basin initiative. What is the main aim of this initiative?

A. To make the upper course countries more beneficiary of the water than the lower countries.

B. To bring about equitable utilization of the river among the basin countries.

C. To ask the lower course countries for a compensation for their use of the Nile water.

D. To share the finance and benefit of dams that will be constructed both in the upper and lower course of the river.

Explanation: The main aim of the Nile Basin Initiation (NBI) is to bring about equitable utilization of the river among the upper and lower riparian countries.

Answer: B

12. What type of vegetation in Africa is extensively developed in areas that have wet summers and dry winters?

A. The Tropical grassland vegetation

B. The tropical rainforest vegetation

C. The Afro-Alpine vegetation

Telegram: https://t.me/ExtremeSeries

D. The Mediterranean vegetation

Explanation: Tropical grassland vegetation develop in the area of tropical continental climate which is characterized by wet summer and dry winter.

Answer: A

13. Maquis, cork oak and wild olive plants are commonly grown in which of the following climatic regions of Africa?
    A. The Tropical continental climatic region
    B. The Temperate continental climatic region
    C. The Mediterranean climatic region
    D. The Equatorial climatic region

    Explanation: Maquis, cork oak and wild olive plants commonly grow in Mediterranean climate region.

Answer: C

14. A wild animal called 'jerboa' is mainly found in which one of the following climatic regions?
    A. Desert and semi-desert
    B. Tropical maritime
    C. Monsoon
    D. Highland

    Explanation: Desert and semi-desert areas host many times of wild animals such as wild ass, snakes, fennel fox and Jerboa.

Answer: A

15. Natural vegetation and wild animals of Africa are facing serious threats due to various human actions. What conservation measure should be taken in order to safeguard these natural resources.
    A. Encouraging extensive use of firewood
    B. Promoting domestication of wild animals
    C. Supporting legal human settlement
    D. Raising the awareness of people

    Explanation: Raising the awareness of the people is a key to overcome challenges faced by natural vegetation and wild animals of Africa.

Answer: D

16. In which of the following climatic regions of Africa are Ferrasols mainly found?

Telegram: https://t.me/ExtremeSeries

A. Mediterranean
B. Equatorial
C. Highland
D. Monsoon

Explanation: Ferrasols are red and yellow in color. They are mainly found in Equatorial areas.

Answer: B

17. One of the following is among the most densely populated areas of Africa. Which one is it?

A. Namibia
B. Mauritania
C. Sao Tome and Principe
D. Central African Republic

Explanation: Sao Tome and Principe is one of the most densely populated country. Its average density is 169 people/km^2.

Answer: C

18. Which region of Africa has the highest rate of mortality?

A. Western Africa
B. Eastern Africa
C. Northern Africa
D. Southern Africa

Explanation: According to UN world population data sheet (2009) report, Southern Africa has the highest rate of mortality which is 15/1000.

Answer: D

19. Which of the following countries is known for having the lowest sex ratio in Africa?

A. Malawi B. Uganda C. Gabon D. Senegal

Explanation: Sex ratio refers to the proportion of males to females in the overall population of a given area. The ratio of Malawi, Uganda, Gabon and Senegal is 98%, 97%, 103.66% and 95.3%, respectively. Therefore, Senegal has lowest population density.

Answer: D

20. What is the movement of people from one area to another in search of seasonal job called?

A. Temporary migration
B. Permanent migration
C. Intra-continental migration
D. International migration

Explanation: Temporary migration involve the movement of people whereby they have leave their original residence for another for short period of time, and come back to their original place.

Answer: A

21. At what stage of the Action Research is the Research Design prepared?
   A. After collecting the required data
   B. Before reviewing the literature
   C. After formulating the research problem
   D. Before defining the objectives of the study

Explanation: Research design is the conceptual frame work within which research work is could be conducted.

Answer: C

22. Assume you are conducting an action research entitled 'Lateness of students for morning classes'. What will be the first step to conduct this action research?
   A. Making review of literature
   B. Stating objectives of the study
   C. Collecting the required data
   D. Determining the sample size

Explanation: After formulating research problem if could better for the researcher to define the objectives of the study.

Answer: B

23. What is the **disadvantage** of having a large areal size for countries?
   A. Shortage of agricultural products
   B. Unavailability of diverse resources
   C. Difficulty of communication
   D. Causes conflicts of ethnic groups

Explanation: Advantage of having large size are possessing diverse agro-climate zones, possessing a large amount of arable land, having a great variety of mineral resources.

Answer: C

24. Which of the following explains the relative location of Ethiopia?
   A. It is situated west of Djibouti.
   B. It is found north of Eritrea.
   C. It is located east of Somalia.
   D. It is located southwest of Sudan.

Telegram: https://t.me/ExtremeSeries

Explanation: The relative location of Ethiopia is west of Djibouti, north of Kenya, Northwest of Somalia south of Eritrea and East of Sudan.

Answer: A

25. What proves the relative compact shape of Ethiopia?
   A. Ethiopia has a large geographical areal size.
   B. Ethiopia is a landlocked country.
   C. It is located a short distance away from Equator and Prime meridian.
   D. Its small differences between latitudinal and longitudinal distances.

   Explanation: Ethiopia has relatively compact shape. This is proven by its small differences between latitudinal and longitudinal distance.

   Answer: D

26. Which of the following major events took place in the horn of Africa during the Paleozoic Era?
   A. Intensive volcanic activities
   B. Outpouring of trappean lave series
   C. Predominance of invertebrates
   D. Disappearance of dinosaurs

   Explanation: Major events took place in the Horn of Africa during the Paleozoic area were denudation and peneplanation, formation of coal, and predominance of invertebrates.

   Answer: C

27. Which of the following eras is associated with a pluvial rain in the horn Africa?
   A. The Paleozoic Era
   B. The Precambrian Era
   C. The Cenozoic Era
   D. The Mesozoic Era

   Explanation: A heavy rain called pluvial rain occurred in the Horn of Africa as a result of climate change in the Cenozoic era, Quaternary period.

   Answer: C

28. Among the following mountains, which one belongs to the south-eastern highlands of Ethiopia?
   A. Assimba
   B. Guna
   C. Gughe
   D. Batu

   Explanation: South eastern highlands consists of Asi-Bale massifs,

Telegram: https://t.me/ExtremeSeries

Harerghe plateau and Sidama plateua. Batu mountain belongs to Bale massifs.

Answer: D

29. What makes the Afar Triangle different from the other rift valley subdivisions of Ethiopia?

A. Prevalence of fossil rich sediments
B. Presence of dense human population
C. Dense vegetation cover of the area
D. Presence of lakes of aesthetic values

Explanation: Afar Triangle of Ethiopia is different since it consists of fossil rich sediments and rich archaeological sites.

Answer: A

30. Which of the following southeastern lowlands borders the Indian Ocean?

A. The Afar plains
B. The Benadir plains
C. The Borana plains
D. The Elkeri Plains

Explanation: The Benadir lowland (in Somalia) is grouped in the SE lowlands of the Horn of African. It border with the Northern Indian ocean.

Answer: B

31. In which of the following areas is most of the Ethiopian population concentrated?

A. Lowlands and plains
B. Highlands and plateaus
C. River valleys and lakes
D. Desert and semi-deserts

Explanation: Population distribution in Ethiopia is uneven. Most of the population concentrated in the highlands and plateau.

Answer: B

32. Which one of the following factors is related to the current population distribution in arid and semi-arid lowland areas of Ethiopia?

A. Nomadic herding
B. Mixed agriculture
C. Sedentary farming
D. Shifting cultivation

Explanation: The lowlands in most parts of Rift valley and peripheral areas of are characterized by pastoralism with temporary settlement.

Answer: A

Telegram: https://t.me/ExtremeSeries

33. In which of the following areas are most urban settlements of Ethiopia found?

A. On steep slopes of mountains
B. Along major transport networks
C. Along the main Ethiopian Rift Valley
D. Around major rivers and lakes

Explanation: Most urban settlements of Ethiopia have developed along major transport routes, which attracted people the settle in those areas.

Answer: B

34. What generalizations can be made about crude death rate (CDR)?

A. It serves as an indicator for future population potential.
B. It reveals the age and sex patterns of mortality.
C. It is a poor indicator of socio-economic condition of population.
D. It provides detailed information about mortality in a given population.

Explanation: The CDR of a given population reveals neither the age and sex patterns of mortality levels nor the socio-economic characteristics of a given population

Answer: C

35. Developing countries put blames on the developed countries for their intensive use of fossil fuels. What major threat relates to the intensive use of fossil fuels by developed countries?

A. Water pollution
B. Air pollution
C. Soil pollution
D. Noise pollution

Explanation: Most of developed countries intensively use fossil fuel for industries and vehicles. This cause air pollution.

Answer: B

36. Which one of the following regions has the lowest percentage of urban population in Ethiopia?

A. Afar B. Gambella C. Sidam D. Harari

Explanation: Harari national region has the lowest urban population from the country's urban population. It is about 0.84% in 2007 census.

Answer: D
